TREATISE ON VIBRATIONAL THERAPY

*Before presenting you extracts from the Teachings of light,
from the ‘Treatise on Vibrational Therapy,’ here is some information about the training
courses offered by the International Academy of the Quantum Creator.*

The International Academy of the Quantum Creator offers a comprehensive programme that combines **spirituality**, energy healing techniques and practical applications of quantum science. This unique training supports your awakening, develops your full potential and guides you towards a life aligned with service.

By harmonising the principles of **quantum physics** with the **ancient wisdom of Atlantis and Lemuria—civilisations that had already mastered the ‘quantum’**—you learn to manifest this inner transformation concretely in every aspect of your daily life and contribute to the vibrational elevation of the human Collective. The quantum creator emerges from the transformation towards the original light.

The International Academy of the Quantum Creator radiates a **Christic energy** imbued with **love-light**, accompanying the collective transition towards the Age of Aquarius. Its work creates a beneficial snowball effect through:

1. **Energy** purification practices
2. An expansion towards **quantum DNA**
3. Significant **rises in vibration**
4. **Quantum meditations on the heart space, the centre of consciousness awakening**

Our **vision** bridges science and spirituality, notably through:

1. Bridges with biology and quantum healing
2. Innovative holistic approaches
3. Workshops on vibrational and solar practices

These initiatives demonstrate the **vibrational power of matter** and provide community spaces conducive to **collective ascension**.

The **EVOCQ®** acronym, which is protected by intellectual property rights, stands for **Energy Vibrational Oscillation & Quantum Coherence**. This visionary method enables the cleansing of the auric field, the release of limiting memories, and the reconnection of each individual to **their original vibration**.

Whether you live in France, Belgium, Switzerland, Canada or elsewhere in the world, our training is fully accessible remotely and adapted to your own pace. You will study:

1. Subtle, energetic and vibrational anatomy, and the anatomy of awakening
2. Cutting-edge **vibrational ascension technologies**
3. How the **Intelligence of Light** operates
4. The most **advanced ascension technologies**

All these tools will enable you to effectively guide **souls** towards their **awakening**, to integrate **deep inner peace** and an **open heart** into your life, thereby helping the Collective to move towards an awakening of consciousness.

Please note that the training in quantum healing practices is spread over two in-person sessions, each lasting 9 days.

Would you like to access **high-quality, high-vibrational** teachings
AND master the EVOCQ® method?

Who is the EVOCQ® vibrational therapy practitioner training course for?

The **International Academy of the Quantum Creator** welcomes anyone with a high vibrational potential who is already on a path of spiritual elevation and aspires to become **an EVOCQ®-certified vibrational practitioner**, to study the “Teachings of Light”, or to **integrate quantum teachings** into their current practice as **an EVOCQ®-certified Light Intelligence Coach**, or into their personal life.

Indeed, this **training** programme is also aimed at experienced practitioners wishing to enrich their practice with Light Intelligence technologies to greatly enhance the effectiveness of their support and place themselves at the service of a more humane humanity.

It is important to note that the Academy offers **three** distinct **training pathways**, each designed to balance professional development with personal fulfilment. These pathways combine **theory, quantum healing practices and personalised ascension support** to foster your **energetic awakening**, your **expression of light**, and your **professional development** in the field of vibrational and solar therapy .

Here are the three pathways that provide access to the Teachings of Light,
whatever your circumstances:

1 – Explore [the SOLARIS Cristal Pro Practitioner pathway](#): become an EVOCQ®-certified vibrational therapy practitioner

Over two years, this comprehensive programme leads you to a professional practice and ascension mastery through

1. In-depth **theoretical assessments**
2. **Supervised practical** sessions
3. Immersive workshops on the application of light technologies
4. Personal ascension towards mastery
5. The study of the Teachings of Light

You will develop the skills to create individual or group programmes, always guided by an ethic of the heart and high vibrational guidance to support awakening souls.

2 – Explore the [SOLARIS Cristal Pro Satellite pathway](#): enrich your existing practice

Ideal for practising holistic therapists wishing to integrate the **quantum dimension**:

1. Integrating the EVOCQ® **method** into your practice
2. Refining your **therapeutic vision**
3. **Body-soul-self-love** alignment from a deep humanistic perspective through the [Teachings of Light](#)

3 – Explore the [SOLARIS path Crystal Soul Family](#): transmission within family and among friends

A non-professional approach to:

1. Sharing **vibrational tools** with your loved ones
2. Raising **the energy** of your inner circle
3. Creating joyful and **vibrational** moments
4. Being of **service**
5. **Strengthen your connections** through the soul family
6. **Discover the world of energy**, and consciousness-raising, and consider becoming a professional

Whatever your path, you can choose your learning resource from our Open University*:

1. A **comprehensive** 7 modules **multimedia manual of spiritual, quantum and energy teachings** dedicated to multidimensional self-knowledge
2. 54 learning resources to support **your personal ascension journey**, including the creation of a *Lightguide*
3. Enriched audio files and interactive quizzes
4. 12 months of **individual mentoring** to purify your energies and raise your vibration
Access to the soul family, the '[Sun Children](#)' [community](#) to reconnect with your soul
5. **2 in-person sessions, each lasting 9 days**, to learn energy healing practices (Level I) and quantum healing practices (Level II)
The previous stages are required in order to gain access to the in-person sessions.
6. The **SOLARIS Crystal Pro Practitioner** pathway requires participation in all these stages

* **The Open University** facilitates your commitment and allows you to discover our teachings before making any long-term commitment, in line with your **personal pace** of evolution. :

This flexible **training programme** is ideal for exploring mediumship, opening your channel of pure light, exploring the karmic plan or vibrational ascension techniques, without any constraints. It represents a first step towards personal **awakening** and **energy mastery**, with absolute respect for your **consciousness**.

We have selected a few pages representative of the Teachings of Light - the Treatise on Vibrational Therapy.

The two introductory pages will give you an overview of the structure of the Teachings of Light. You will find spiritual, energetic and quantum teachings, explanatory diagrams, and extracts from the introduction, Module I, Module II, Module III, Module IV, Module V, Module VI and Module VII.

Enjoy reading!

TREATISE ON VIBRATIONAL THERAPY

INTRODUCTION

ON THE PATH TO AWAKENING, VIBRATORY ASCENSION...

Dear readers, dear learners,

This handbook on 'multidimensional self-knowledge' might just as well be called
'Awakening on the Path of Vibratory Ascension'!

The seven modules of this manual combine spiritual, energetic and quantum teachings because awakening leads us towards wholeness, the ONE, integration and an understanding of the interdependence of all things that exist in the Universe and the Multiverse.

I invite you to join this timeless quantum journey of initiation through your physical body, which is the seat of the awakening of consciousness. I am your guide! The awakening of consciousness is encoded in the human genome – what a blessing! This also means that there can be no other place for awakening than the physical body in order to embody the light on Earth.

I will guide you on this great journey with theoretical teachings, videos and numerous audio recordings of quantum meditations and teachings to help you experience the concept!

MODULE I is dedicated to the physical body, to clarify and highlight that it is the bearer of 'divine perfection' within its dense and subtle structure. I guide you throughout this fantastic and magical journey to the centre of your perfect body, so that you may detect the perfection visible to those who are awakening.

MODULE II boldly asserts that our physical body is light! Once again, I am your guide, and I invite you on a multidimensional and multimedia journey that will dispel all doubts on this subject.

These first two modules thus lead us to **MODULE III**, dedicated to 'The Anatomy of Awakening'. Through these teachings, you will learn that the awakening of consciousness, always linked to higher frequencies, transforms the functioning of the physical body in a phenomenal way.

Transformation in the present means memories! **MODULE IV** explores the vast theme of memories encoded in the deepest substance of the human being, in the Earth, in the Universe. Through quantum journeys, you will learn and experience that everything is memory and that we are constantly creating memories! We are the masters of our creations and therefore also of the memories we create.

You will therefore quickly understand why **MODULE V** is dedicated to the 'Body of the Source Child', the immaculate child within us, the original child as an archetype of healing in the vibrational sense of the term, rather than the medical one.

INTRODUCTION

It goes without saying that at this stage of the manual, I feel the need to address the theme of the interdisciplinary quantum vision that underlies this vast teaching on the awakening and raising of the vibration of beings. I am not a physicist. That is why **MODULE VI** will be a summary of all the aspects of the ‘infinitely small’ that we have covered in this manual, in order to awaken us to the liberating quantum axis of the soul.

Our body and our awakening being on Earth, which is raising its vibrations, will, as the process of awakening progresses, require light nourishment. This is the subject of **MODULE VII**, which invites readers to experience this light nourishment in their daily lives.

IMPORTANT! I offer reflections and introspections at the end of each module. These sections will enable you to apply the teachings to your soul’s journey. Choose a beautiful notebook in which you can record your introspections, draw, paint and write; this will be your ‘Lightguide’, your link between the concept and your expanding consciousness.

To conclude this introduction, I present here a summary diagram of the method I have created: **the EVOCQ® method**.

The ‘Energy Vibrational Oscillation & Quantum Coherence’ method is associated with a totem animal, the dragonfly.

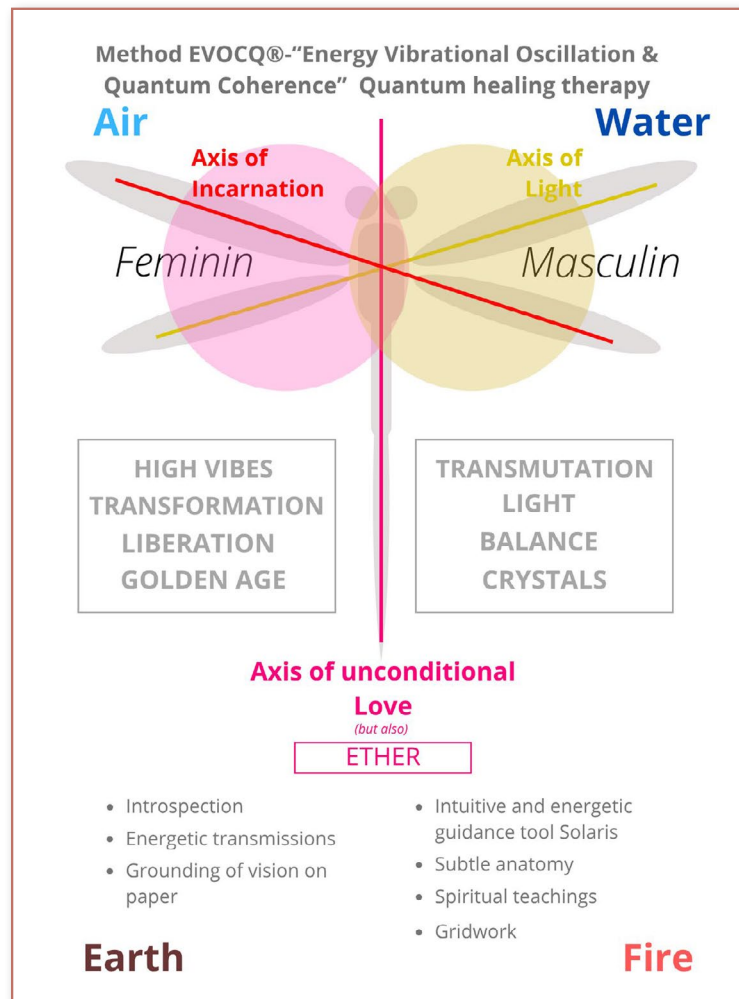

✧ ✧ ✧

‘These iridescent creatures are the most beautiful and fascinating of insects. [...] They come from Sirius and have much to teach us. [...] They serve us joyfully by demonstrating cutting-edge technology. They constantly remind us of the incredible technology of Atlantis by showing what humans were capable of achieving in that era. When hunting, they calculate the distance to their prey, the direction in which it is moving and the speed at which it is flying. In a fraction of a second, they calculate [their] angle of approach. Their eyes are extraordinary. [...] Each facet creates its own image. Dragonflies’ eyes can compile 3,000 images into a single image [...]. They can also move their four wings independently of one another. [...] They move forwards, backwards, sideways, then in the next instant dart off in another direction or even fly upside down. [...] They are regarded as the magicians of the insect world.’

Diana Cooper, *The Archangels’ Guide to the Animal Kingdom*, 2018, CONTRE-DIRES

INTRODUCTION

I leave it to you to unpack **the depth of this multidimensional method** with the help of the following diagram:

Finally, I wish you a pleasant journey! It is sure to enchant you, awaken you and heal you in the sense explained in this manual: healing as the ultimate protection through the restoration of your bodies of vibrant light!

I invite you to look within and forge your own vision, to feel all this information in your physical body, because we are only at the very beginning of vibrational medicine!

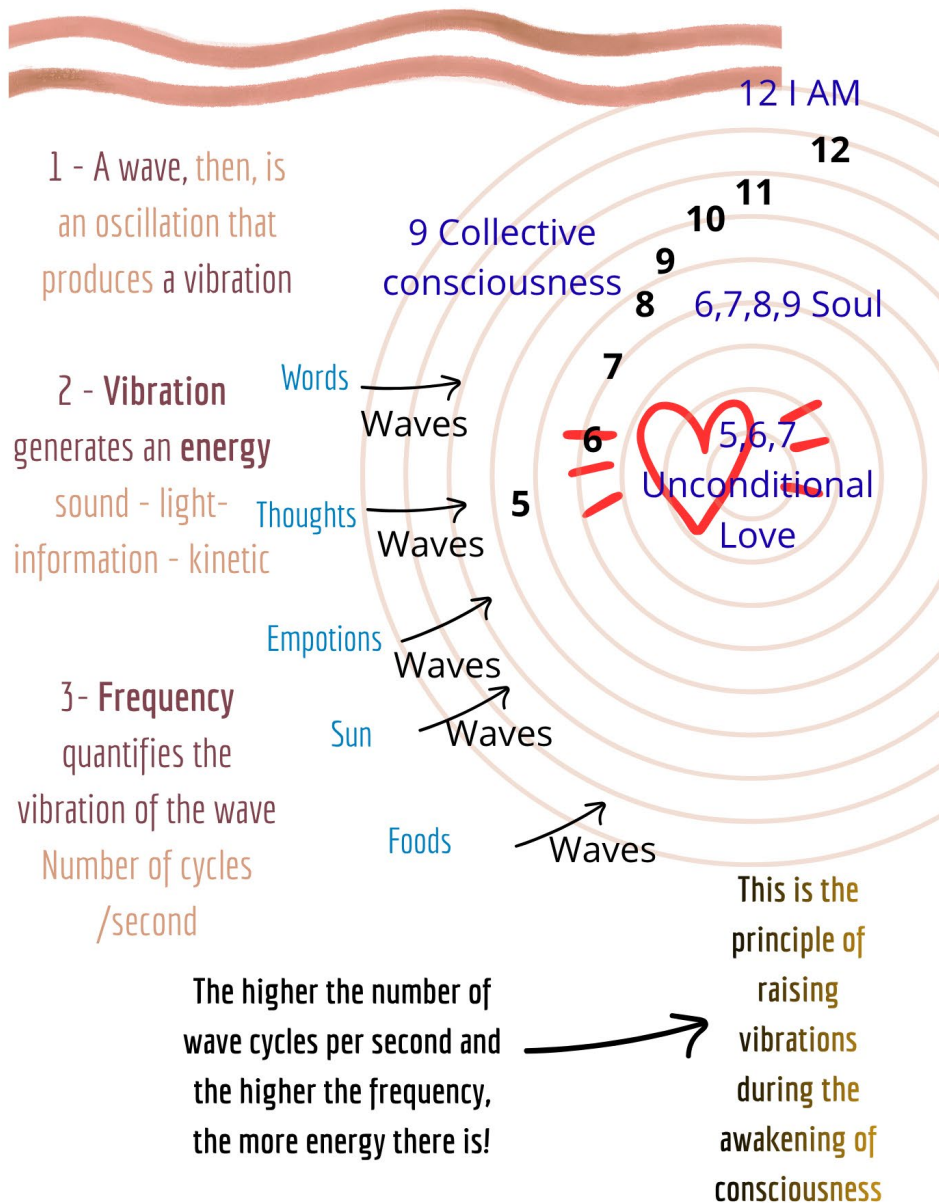

Above all, we are going to have fun like children throughout the journey! There is no need to take ourselves too seriously; that would hinder our awakening of consciousness!

Love and light
Muriel

MODULE I

The awakening of consciousness and the embodiment of Christic energy give the heart the ability to radiate scalar waves!

Vibration- Energy-Frequency

© DR

MODULE I

- 
- **Throughout the spiral of time, energy becomes embedded in our bodies and in our DNA**
 - **Everything that vibrates creates energy:** sound, light, information, kinetic energy. See the diagram above! It is a force in action that shapes the biology of living beings.
 - **What matters** for our health is that this energy can flow without creating blockages

“Vibrational medicine involves deliberately using one frequency to positively influence another or to restore an organism to balance. It is one component of energy healing therapy, which also uses information – coupled with vibration – to bring about change.”

Cyndi Dale, *The Subtle Body: An Encyclopaedia of your Energetic Anatomy*,
p.22 of the French version

9 Do you know exactly what vital energy (chi, prana), universal light energy, and the Intelligence of Light are?

This energy will be the subject of the forthcoming modules relating to the phenomenon of vibrational ascension and awakening. But we can already say, as transcribed and quoted from **Olivia Boa**, *Luminance*, Éditions Ariane, p.15 and following:

- Everything we perceive in this world is manifested light.
- Light vibrates. It is the different frequencies of light that allow everything to exist. Here we return to fractals.
- **Light is consciousness and consciousness is light!**
- Our brain is a marvelous transmitter/receiver of frequency fields. These fields are transmitted throughout our physical body **via the vagus nerve**, which plays a central role in the process of awakening. Our brain shapes its entire environment, hence the notion of the creator. And creation must occur in resonance with the powerful energy of the heart, which brings the brain into harmony!
- Light has a great capacity for malleability; it allows for infinite creation (the concept of the quantum creator, of plasticity, of ‘unlimited’ thought...)
- This powerful, eternal light, which we call ‘Source’, is **ONE harmonic** that propagates throughout the Universe.
- **“Everything passes through light!”** “Without this understanding, many of us will remain in darkness and miss out on an almost infinite potential.”
- **The photon is the particle of this light.** It can be everywhere at once. It has no nucleus.

I - LIGHT AND THE GOLDEN AND CRYSTAL AGES

“It is unconditional Love that heals all!”

1 What's new in the Universe?

We are both spectators and participants in a magical period of transition for our Earth and for humanity. The Universe is offering us the opportunity (once again, if I may say so, as this was already the case in the times of Atlantis and Lemuria) to purify the traumatic material within our bodies, the Earth and the Universe – if we think in quantum terms – of the predatory memories from the eras when humanity was still an apprentice. We are entering a cosmic cycle revealing Unconditional Love, Peace and the elevation of individual and collective consciousness, due, on the one hand, to our galaxy's passage through the photonic rings of Alcyone—also known as our great central Sun—and, on the other hand, to the new, highly vibrational evolutionary trajectories emerging in the Universe.

The Earth had already prepared for this change, for as early as 2012, its crystalline grids—which correspond to a network of high-frequency energies fuelled by **the super-photon plasma** of **Alcyone** and **Source**—became active, the vibrational ascension being a purely natural evolutionary phenomenon.

So, of course, we understand that human beings, influenced by these monumental energetic shifts, are themselves inevitably driven towards transformation. This is not happening without problems or upheaval within the human collective!

For some, this change is completely unfamiliar or far-fetched. For others, it brings light and hope for Humanity. Some commit themselves body and soul, whilst others endure the process because they fear it or because they are unaware of it.

This teaching, or rather this initiation, focuses primarily on the possibilities that this new era opens up for us, both in terms of our energetic development and expansion and in terms of the health and well-being of human beings, the Earth and all living things. Not to mention the incredible technologies that this age of crystal and light will give rise to: telepathy, teleportation, self-healing, unprecedented creations, remote healing and things we cannot yet even imagine...

MODULE III

1 What a pleasure to introduce this topic!

Indeed!

The reconnection of our dense and subtle anatomies during the process of awakening consciousness and rising vibrations challenges the fixed image we may have had of our anatomy!

The physical body integrates subtle energy and light (if it is possible to distinguish between them) deep into its tissues, nervous system, glands, cells and DNA. The physical body has been waiting for this! For so long!

- To rediscover its full potential of light,
- Its crystalline senses,
- Its direct and conscious interactions with quantum space through the 'quantum axis' to its full potential,
- The activation of its biocrystal,
- The expansion of its DNA,
- Its full vital potential, its rejuvenation and vitality, its joy,
- Its telepathy

In this module, we will shed light on the multidimensional anatomy of awakening and its specific features, although the transformations of the body and psyche brought about by the process of awakening consciousness are not studied in detail by science. It is noticeable that people who bear witness to their awakening, as well as ancient Indian, Tibetan, Chinese, Taoist texts, etc., all describe these very same transformations. Even if they occur in slightly different ways depending on the soul path of those who are awakening, the processes are identical.

So why does this subject delight me so much?

Because before awakening, a human is nothing more than a chrysalis. The liberation brought about by the process of awakening transforms them into a butterfly, a fully realised human being who has finally spread their wings into the unseen!

Muriel Gaillard

2 We are a vast network of dense and subtle pathways

In our physical body, we are familiar with the nerves that transmit information, the blood that carries information through the veins and arteries, the air that also circulates through its specific pathways, and food that follows the body's digestive tract. Everything is connected and interdependent!

The Leela game is a tool for self-knowledge that allows you to “check your route” and correct your direction of movement if necessary. Leela is one of the systems of self-knowledge, a way of understanding life and the laws of the Universe.

Game mechanics: the player rolls the dice, allowing karmic forces to determine the next move on the board. They travel through various planes of existence, moving up with the arrows and down with the snakes, seeking to understand the intentions of their higher “Self” wherever they find themselves.

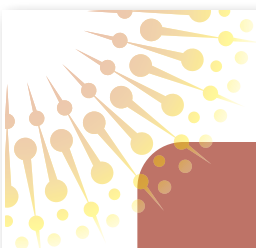

The game ends only when the player fully understands the essence of karmic forces and attains **cosmic consciousness**.” Source <https://leela.eu/fr/>

3 The primordial memory where we are all stardust

“Living matter is made of astroparticles”

To learn more about the origin of matter, it is worth looking into the formation of the universe. The Universe created matter in its own image, from the five elements which exist in a subtle state in the Universe and a dense state on Earth. In other words, we are all cut from the same cloth.

- The ‘creation of the Universe’ is estimated to have taken place around 14 billion years ago.
- The Earth is thought to be 4 billion years old.
- The cell was created over the first 3 billion years.
- All creation requires the dimension of time.
- Time is needed for the **gradual** process of **transformation, adaptation and transmission**.
- Biodiversity was concocted according to a universal recipe that required letting EVERYTHING simmer properly.
- One stage built upon the next.
- Matter is unstable; it is also ubiquitous, meaning it is present everywhere.
- The planet’s sedimentary rocks tell the story of the Earth; within them lie traces of the origin of matter. The same is true of water: certain very deep water sources or certain rock crystals contain Christic energy, the original vibration of Source, as well as our light signatures.
- Minerals, plants and animals—and therefore humans too—carry their history deep within themselves.

I - THE SOURCE CHILD AND THE SOUL

“It is unconditional love that unites!”

1 Let us introduce the theme of the soul

The healing or protection of our light, as we saw in **Module I**, goes, in my view, far beyond the taking of medication. In a way, this theme lies at the heart of the creation of this course and of my pure desire to convey these channelled teachings very clearly.

If we remain disconnected from our soul, attempts at healing will always be confined to the very restrictive framework of taking chemical medicines.

Let us speak of protection rather than healing, as practitioners of vibrational therapy are not permitted to use that term. Moreover, the term ‘protection’, which is at the root of the term ‘healing’, ultimately applies well to the effects of energy rebalancing and the revitalisation of the aura, which, if it is very luminous, constitutes a real protection for the human being. The means of achieving this are of a different nature to chemical medicines, that is for sure!

These methods require human beings to reconnect with their soul, their divine vibration, the Universe, their immaculate Source child, their signature of light, their stellar origins, their heart, and to commit to a world of consciousness, kindness, forgiveness, purity and purification.

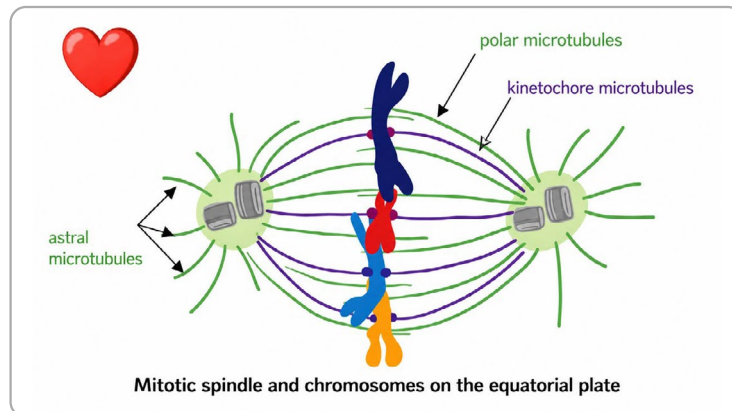

Here, medicine is solar, and the choice of vibrational frequencies is of the utmost importance! Ascension is, above all, a natural process for human beings.

Vibrational, solar and ascension medicine involve the human being reconnecting with their multidimensionality, with Unity within the awareness of duality, and with their Source Child, untouched by any low-frequency conditioning from their memories—as an archetype, of course.

In this Module V, we will explore in greater depth the emotional aspect of protection or healing, through an understanding of the mechanisms of our chakras’ development, which, I would remind you, act as the interface between dense and subtle energies, like ultra-sophisticated light transformers.

MODULE VI

- **Astral microtubules:** these play a role in mitosis. **Mitosis is the process by which two daughter cells are formed that are genetically identical to the parent cell.** Division of genetic material.

Source: <https://quizlet.com/fr-fr/fiches-de-memorisation/la-mitose-740358330>

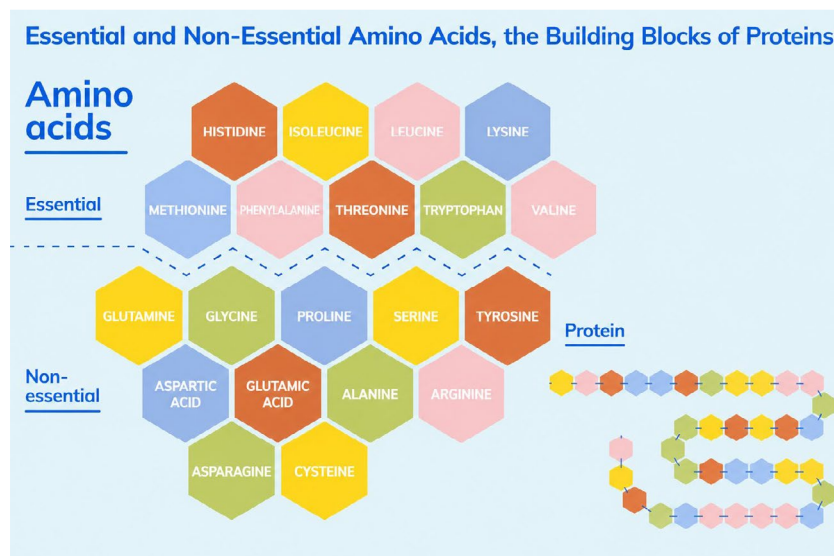

Image from <https://www.pensersante.fr/les-acides-amines>, merci !

Some say that amino acids are the basis of life on Earth. These 20 amino acids are sufficient to produce the thousands of proteins found in a living organism. The number 20 is linked to the manifestation of life. We know that there are also 20 amino acids in the 13 filaments of the microtubules in the centrioles of cells.

This is just one example. This is how we find sequences of numbers in the architecture of the human body and beyond.

👉 I'll leave it to you to add to this list as you make your own discoveries.

I - ENERGIES, THE BODY AND CONSTITUTIONS ACCORDING TO TIBETAN MEDICINE

*“The five elements that make up food nourish
our physical body with their subtle energy!”*

1 Introduction to the art of subtle nourishment!

Welcome to this module dedicated to vital energy in relation to nutrition!

All the core modules of the SOLARIS Cristal Pro training programme aim to make the ascension process understandable in its entirety and in its spiritual workings. Vibrational ascension and the spiritual journey of awakening towards Oneness and higher vibrational frequencies are, in fact, about the proper use of vital force and the path that allows us to generate this vital force or avoid depleting it.

Diet is one of the most important factors because we are what we eat!

Vibrational ascension takes place through our physical body, which is our earthly vehicle composed of dense energies. In this context, the role of diet is to nourish our cells with high-vibrational energy and light. It goes without saying that ‘junk food’ creates toxins in our body; this is the worst possible scenario when it comes to destroying vital energy.

Tibetan medicine SOWA RIGPA, which translates as ‘Science of Consciousness’, advocates a healthy diet with wholesome, locally sourced produce, but it also offers us a dietary model tailored to our energetic constitution. In itself, we automatically apply this principle to plants and cars – it goes without saying that all this is far more complex when it comes to the human body! It is no longer a postulate in the case of cars, because it has been proven. Nor is it a postulate within Tibetan medicine, because the application of this theory quickly has a very positive impact on health and vitality, and that in itself constitutes proof. **It is a postulate for those who do not yet apply mindfulness to their diet.**

What I am offering you here, in this module, is not a course in Tibetan medicine, but an opening of consciousness, an awakening of awareness in the field of nutrition, with a fascinating presentation on ‘**flavours**’. To better grasp the theory of flavours, it is essential to understand the Tibetan medical perspective on energies, the body and energy constitutions.

I hope you enjoy reading this! You will come to realise that this perspective is fascinating and so natural. In a way, you already know this!
